Course: Machine Learning

Quiz: Part I. The Fundamentals of Machine Learning

Generated: September 25, 2025 | Questions: 5

Instructions:

Choose the best answer for each question. Mark your answers clearly.

Questions:

Question 1:

What is the primary goal of machine learning?

- A) To enable computers to learn from data
- B) To replace human intelligence
- C) To automate all tasks
- D) To create complex algorithms

Question 2:

Which of the following is a common type of machine learning?

- A) Supervised learning
- B) Unsupervised learning
- C) Reinforcement learning
- D) All of the above

Question 3:

What is overfitting in machine learning?

- A) When a model performs well on training data but poorly on unseen data
- B) When a model is too simple to capture the underlying patterns
- C) When a model is trained on too little data
- D) When a model is too complex

Question 4:

Which of the following is NOT a step in the machine learning process?

- A) Data collection
- B) Model evaluation
- C) Data visualization
- D) Model deployment

Question 5:

What is the purpose of a validation set in machine learning?

- A) To tune hyperparameters and prevent overfitting
- B) To train the model
- C) To test the model's final performance
- D) To collect more data
